

THE POWDER COAT SELECTOR

NOTE: All powder coat recommendations are based on the assumption projects are located 100m or more from the coast. Powder coat warranties will vary according to location.

For coastal application, speak to your powder coat applicator to confirm. As a rough guide, Interpon recommends D2015 with cleaning intervals of three months. Dulux recommend Duratec, Electyro or Fluoraset, with cleaning every three months as a minimum.

Some colours are prone to fading. Always check the allowable colour variance on your selected product.
